

About the Program

Clinical Leadership in Practice
(CLiP) Program

The PMCV has developed a revised modular version of the successful two-day Professional Development Program for Registrars (PDPR), a national initiative that was one of the pioneering programs to focus on the management and leadership responsibilities of medical doctors exclusively.

The Clinical Leadership in Practice (CLiP) Program is delivered in a flexible modular format and comprises five modules.

Participants

Doctors working in registrar positions or who will shortly be moving into a registrar position.

Certification

Certificates of Attendance will be given for each of the modules. However to qualify for the PMCV Clinical Leadership in Practice certificate completion of all five modules will be required.

Module Fees

Costing for each module varies and is reflective of the supply and use of materials and exercises within each module. Refer to the CLiP program flyer for the cost of each module.
